

ABOUT

FRANCISCO PULIDO

CHIEF FINANCIAL OFFICER

Francisco Pulido is responsible for the financial and legal area at Beyond Technology. He manages and coordinates both tasks, including strategy, planning, and financial control and the management of legal and intellectual property matters.

He has worked as an economist in banks and the state public administration of Morelos. He collaborated in creating the IMEF Indicator, the first private sector indicator in Mexico to monitor the economic situation. Specialists in both the public and private sectors are now widely using it. He designed and implemented a Technology Park in Morelos and directed Morelos's Science and Technology Council. Francisco helps the information industry to create long-term financial strategies and provide greater certainty to Beyond Technology and the ecosystem in which it collaborates.

José Francisco is an avid reader of economics and science, loves to learn, loves dogs, and is committed to caring for the environment of Cuernavaca and Morelos.

Beyond Technology is a global company dedicated to business transformation through the implementation of disruptive technology. With over 30 years of experience in international markets such as the USA, the Middle East, Asia and Latin America.
